

CONTENTS

Mathematical and Computational Physics

- V. BUBILAITIS and D. ABRAMAVIČIUS. Nonlinear exciton equation factorization for non-perturbative absorption modelling 1
- J.-C. PAIN. Expression of special stretched $9j$ coefficients in terms of ${}_5F_4$ hypergeometric series..... 19

Atoms and Molecules

- A. KYNIENĖ, V. PABERŽIS, Š. MASYS, and V. JONAUSKAS. Electron-impact ionization for Kr atom..... 24
- G. GAIGALAS, P. RYNKUN, and L. KITOVIENĖ. Second-order Rayleigh–Schrodinger perturbation theory for the GRASP2018 package: Valence–valence correlations 32

Semiconductors

- L. STAKĖLA, K.N. ALEKSEEV, and G. VALUŠIS. High-frequency conductivity-based terahertz gain models in quantum semiconductor superlattices: A comparative study..... 57
